TRUTH QUEST JUNIOR

REAL VS. FAKE

SUMMARY

TEAM 42 TRUTH QUEST

With the rise of AI, the volume of deep fake content our kids are confronted with daily is growing exponentially.

Parental control is not enough anymore - our kids, we ALL, need to develop online critical skills.

Through this SRF Train game, we aim to teach how to listen and develop their intuition by following a process of critical thinking.

From asking questions through checking their sources, they can become better at recognising fake news and avoiding misinformation.

The Game Playthrough has different journeys that need further development.

Switching from consuming content "like a zombie", to fact checking is extremely hard in this fast paced world.

But with better skills of recognising fake content fast, we can make an impact towards our kids being less scammed and achieving their goals faster with less personal costs.

We strongly advise to develop a Truth Quest SENIOR app too.
